PROJECT - 1

- Project is aimed at developing the front end of a real-world application in React. With this application, which is named BookMyMovie, users can browse upcoming and released movies. Filter released movies based on certain parameters and able to view details such as genre, artists, trailer of released movies

PROJECT - 2

- Created a CR Script with my colleague in a span of 1.5 months for a processing the data from the resource that has to be reviewed and it takes 40 minutes bounded with a least of 30 websites per day, Since only after the approval of the reviewer the data has to be sent to BPM team through the final trigger.As a result it reduces the manual effort time of the reviewer from 40 minutes to 17 minutes, this CR script is approached to the SDE's of our team and considered this as the modelling and included it in the SOP by redefining that into a new phase and it is now part of the process
